

MODERN FARMHOUSE

“At KWD we’ve fallen head-over-heels with a modern farmhouse style, so much so that I chose this aesthetic for my own home renovation – Beechwood. This aesthetic balances comfort, simplicity and modern influences in perfect harmony, blending old and new in masterful ways. Modern farmhouse takes the best of rustic, industrial and contemporary styles to create a sophisticated look without feeling pretentious or unapproachable. Instead it invites you to kick back and relax in comfort. I love it!” KATE WALKER

Modern Farmhouse

- Paint the exterior in black or white
- The interior palette should be based on sage greens or buttermilk yellows with white as a backdrop
- Add interest to walls with white wood panelling, shiplap and strapping
- Mix furniture from different eras for a lived-in look
- Add texture with leather, cushions, rugs and throws
- Mix new and old pieces (contemporary mirrors with a rustic antique side table / coach house lights with abstract chandeliers)
- A farm kitchen table, kitchen island bench and a wood fire are a must
- Install barn doors leading into a bathroom or a Dutch door in the laundry leading outside
- Choose sleek industrial door hardware
- Industrial black window and door frames add definition and epitomise the modern farmhouse look.
